

# HELLO, WE'RE TMC.

Our award winning service is designed to **cut fuel costs, reduce administration and provide invaluable information about your fleet.**

**Our service is centred around mileage – an element that tends to drive most other fleet costs.**

In a nutshell, we reduce your fuel bills by accurately recording and auditing your employees' business mileage and fuel expenditure. Drivers log their mileage via our easy to use system or app.

We then audit each journey to ensure accuracy and follow up any discrepancies with the driver to find out more.

We can take direct feeds from your telematics and fuel card providers and overlay this data with your mileage information to provide an even greater level of audit. For example, we know whether the vehicle was present when the fuel card was used. This also enhances the reports we provide.

## Reporting

We hold so much valuable data about the vehicles, journeys made, miles driven, fuel spend and consumption that we put the data to good use and produce a range of management reports each month that you can use to steer your fleet strategy. For example, you can see which vehicles are performing best (and identify those that aren't living up to expectations) so can make informed decisions on vehicle choice lists. You can also identify where you could potentially deploy ultra low emission vehicles.

Our service covers all driver profiles – company car drivers, LCV fleets, pay and reclaim and grey fleet drivers. We provide a payroll file for private mileage deduction/business mileage reimbursements.

**On average TMC customers reduce their fuel bills by 15.4% and save the equivalent of 18.06 pence per litre on their pump costs.**

And as for your drivers, they benefit from

- An easy to use system and an app that uses GPS to track journeys
- Reminders when mileage claims are due – so they don't miss out on mileage claims
- UK based user helpline offering drivers support

We can also help with fuel cards, grey fleet compliance, general expense management and tax efficiencies around fuel.

**Gain a 360° view of your drivers, fleet and fuel spend.**

If you'd like to find out more, we'd love to hear from you. You can reach us at:
