

Visa to Drive

Helping fulfil your duty of care obligations

Powered by TMC's award winning software and team of expert auditors, Visa to Drive is the most efficient way of completing documentation checks across your fleet when ensuring duty of care compliance.

Our Visa to Drive service does everything from chasing up drivers for documentation to verifying every detail. With an easy to use online system for employees to use, Visa to Drive keeps all your drivers' up to date documentation in one place. At every step, you'll receive in-depth management information that will enable you to have total visibility and control over the completion of your duty of care obligations.

And because every fleet is different, we've designed Visa to Drive so you can select the specific services you need.

We can help with:

Vehicle Safety Inspection

A key element of duty of care is to ensure that all vehicles, whether company owned or grey fleet, are safe to drive at all times.

Visa to Drive will provide you with auditable records of the below, so you can ensure your fleet has been subjected to regular safety checks:

- ▶ Vehicle Safety Inspection – photo uploads
- ▶ Oil Checks Tyre
- ▶ Pressure Checks
- ▶ Service Check
- ▶ Vehicle Age In-line With Policy

MOT Checks

Ensuring grey fleet vehicles are road worthy is an essential part of duty and care compliance. Visa to Drive gives you the confidence that every vehicle within your fleet is road worthy.

For UK drivers, we check for valid MOT certificates via our direct link with the DVSA. **For international drivers, our system allows them to upload their MOT certificates online, which will then be checked and verified by TMC. This will ensure that your grey fleet vehicles are legally allowed on the road at all times.**

Fleet Policy Acceptance

We upload your fleet policy into our system and drivers must read and confirm they have understood it by selecting a tick box on their account.

Drivers cannot log mileage in our system until they have confirmed the policy has been read. When any changes to the policy are made, the drivers must again declare that they have read and understood the new policy.

Grey Fleet Insurance Policies

If you operate a grey fleet, it's essential that your drivers have business class insurance when driving their own vehicles for work purposes.

With Visa to Drive, drivers are required to upload their insurance details to our online system which are then verified by one of our expert auditors. Upon renewal, the same process will have to be adhered to.

Should an employee fail to submit their policy on time, we will chase them directly and let you know that the driver has breached your fleet policy.

With Visa to Drive you can be sure that your grey fleet drivers are insured at all times - we will handle the process from start to finish.

Tax Checks

It is essential to ensure that all vehicles in your fleet are taxed.

We provide checks to ensure all your drivers are up-to-date in taxing their vehicles. We will also take note of the date the tax expires and notify the drivers when their renewal date is close.

Eyesight Checks

Good eyesight is vitally important when behind the wheel of a vehicle. With UK law requiring drivers to be able to read number plates from a distance of 20 metres, it is important to ensure your drivers have adequate eyesight and are safe to be on the roads.

We can set up a process so that drivers must upload their latest eyesight check to prove their eyesight is at the appropriate level required by law.

Recalls

We check our database and highlight any vehicles which are involved in manufacturer or warranty recalls.

We will add these vehicles to our reporting to ensure you are notified and can take relevant action.

Winter Checks

To ensure your employees' vehicles are safe and reliable, particularly during the colder months, we can trigger questions on which winter checks have been done for each vehicle. These can cover the below:

- ▶ Tyre inspections
- ▶ Battery tests
- ▶ Coolant and antifreeze top-ups
- ▶ Windscreen wiper inspections
- ▶ Lights assessments
- ▶ Oil level replenishment

Visa to Drive is part of our Compliance+ service that takes a comprehensive, proactive approach to reducing occupational road risk by using data to create a 360 degree view of each driver. Additional services include driving licence checks and driver training.
