

# Compliance+

## Occupational road risk management

Compliance+ is a holistic occupational road risk programme.

The technology-based service is designed to increase visibility and improve safety.

Compliance+ covers all employees who drive on business - company vehicle, cash allowance and grey fleet drivers. It is designed as a modular service to enable you to just select the services you need, which include:

- ▶ Driving licence checks
- ▶ Vehicle Safety checks
- ▶ Visa to Drive – MOT checks, vehicle tax checks, insurance policy checks, fleet policy acceptance, winter checks, manufacturer recalls, eyesight checks
- ▶ Data aggregation
- ▶ Mileage Track+ App – monitoring driver behaviour
- ▶ Risk assessments and driver training

Our interactive online dashboards pull all of this information together in one place to enable you to gain a 360 degree view of your employees.

# Why do you need Compliance+?

Every week around 200 road deaths and serious injuries involve drivers on work related journeys.

In 2003 the Health and Safety Executive released a publication called "Driving at Work Managing Work Related Road Safety." This publication issues guidance that vehicles are to be classed as a place of work and therefore fall under the same Health and Safety legislation as a physical workspace.

The fact that cars are classed as a place of work, along with several pieces of road traffic acts and legislations means that employers are obliged to develop Health and

Safety policies to minimise the risks to the health and wellbeing of employees whilst driving a vehicle for business purposes. The development and effective implementation of these policies is a company's "Duty of Care."

In 2008, the Corporate Manslaughter and Corporate Homicide Act came into force and additional pressure was put on companies to act.

These pieces of legislation makes it easier to prosecute companies for health and safety failures that lead to a person's death.

## Driving Licence Checks

We handle the entire end-to-end process of checking driving licences from only £2.50 per UK check, with no additional charges or annual fees.

We provide:

- ▶ DVLA Licence Checks
- ▶ International Licence Checks
- ▶ Additional Driver Licence Checks

This will benefit your business by:

- ▶ Replacing cumbersome, time consuming paper-based administration
- ▶ Instant licence checks via our highly secure web-based portal
- ▶ Management of future checks, to minimise exposure to risk and ensure you are compliant
- ▶ We chase employees who require checks
- ▶ Real time reporting to show status for each driver

# Vehicle Safety Checks

Regular, audited vehicle inspections are a fundamental element of fleet management.

Organisations need to be confident that their inspection process is robust to ensure that the vehicle being used, whether a company, grey fleet, rental or pool vehicle, is safe to drive.

The good news is, drivers can now carry out comprehensive vehicle checks via TMC's app. No more paper work.

You can select what checks the driver should carry out, from a comprehensive list, and at what frequency.

The results are reported back to the business in real time, confirming the vehicle is ok to drive, or flagging any maintenance issues.

▶ Drivers receive a notification on their app to carry out a check.

▶ Driver confirms they have completed the check. They can add comments and upload photos if required.

▶ The vehicle check functionality can also be used for picking up/returning vehicles.

# Visa to Drive

Visa to Drive uses TMC's software along with our team of expert auditors to collect, collate and verify your employees' documentation to meet your duty of care obligations.

Using our Mileage Track app, employees can use their device's camera to upload documentation, or they can upload it to our online system.

We provide a full service to support compliance with local market legislation. And because every fleet is different, we've designed Visa to Drive so the company can select the specific services they need.

Visa to Drive includes:

-  MOT Checks
-  Eyesight Checks
-  Fleet Policy Acceptance
-  Recalls
-  Grey Fleet Insurance Policies
-  Winter Checks
-  Tax Checks

We chase employees for incomplete documentation and, because we provide payroll files, we can also stop payments to employees, fine employees or deduct fuel costs in full, depending on your policy, if they don't comply.

## Data Aggregation

Risk associated with driving is often looked at in silos – licences are checked, telematics systems are installed, but it's only by pulling all of this information together that you can see the full picture of each driver.

We can take feeds from your telematics, fuel card and insurance providers and overlay it with feeds from your leasing company(s) data, mileage and duty of care data to create a 360-degree view of each driver.

## Mileage Track app

Our award winning app Mileage Track+ offers trip recording with the additional benefit of driver behaviour scoring – the ideal solution for ensuring the safety and wellbeing of your drivers whilst on the go.

We use the device's in-built accelerometer, gyroscope and GPS to gather telemetry data to report on:

- ▶ Speeding
- ▶ Harsh Braking
- ▶ Acceleration
- ▶ Cornering
- ▶ Phone Usage (excluding Bluetooth calls)

Drivers are scored on each of the above for every trip and can see their average score on their app dashboard.

Driver scoring is consolidated in an online dashboard, which you can use to analyse the safety and performance of your fleet.

# Risk Assessments & Driver Training

## Risk Assessments

When assessing the safety of your fleet, we begin with risk assessments and analyse the current level of potential risk within your fleet.

## Training Types

### Online Training

Our modules are purposely designed to tackle driver behaviour by creating a supportive, skill-enhancing environment. They are short and engaging, using the latest research to stimulate learning.

We have a suite of over 27 e-learning modules that can be accessed online.

### In-Vehicle Driver Training

In-vehicle training may be an appropriate control measure for very high-risk drivers. These individual drivers will be identified during the risk assessment process and training sessions will be bespoke and specific to their needs.

We can also run bespoke training courses for new employees and specialist driving roles.

The outcomes of the online risk assessments and driver training flow directly into TMC's Data hub providing consolidated data for you, the employee and your business.

**All of our Compliance+ solutions are fully compliant with data protection laws.**
