

Visa to Drive

Helping fulfil your duty of care obligations

Powered by TMC's award winning software and team of expert auditors, Visa to Drive gives you an efficient way of completing driver and vehicle checks across your fleet to ensure duty of care compliance.

Our **Visa to Drive** service ensures employees and vehicles are safe and legal to drive. TMC manage the whole process from chasing up drivers for documentation to verifying every detail. We make it easy for employees to provide the information required through our intuitive app and online system.

As a further incentive, drivers who use TMC's Mileage+ service to capture their mileage,

won't be able to log their trips until they have provided the information required.

You'll have access to all the documentation and the outcomes of the checks 24/7 via an online dashboard.

And because every fleet is different, we've designed Visa to Drive so you can select the specific services you need.

We can help with:

✓ Fleet Policy Acceptance

We upload your fleet policy into our system and app and drivers must read and confirm they have understood it by selecting a tick box on their account.

Drivers cannot log mileage in our system or app until they have confirmed the policy has been read. When any changes to the policy are made, the drivers must again declare that they have read and understood the new policy.

MOT Checks

Ensuring grey fleet vehicles are road worthy is an essential part of duty and care compliance. Visa to Drive gives you the confidence that every vehicle driven on business is road worthy.

For UK drivers, we check for valid MOT certificates via our direct link with the DVSA. For international drivers, our system allows drivers to upload their MOT certificates online,

or via our app which will then be checked and verified by TMC. We schedule checks to check all vehicles have a valid MOT certificate at all times.

Vehicle Tax Checks

It is essential to ensure that all vehicles in your fleet are taxed.

We provide checks to ensure all your drivers are up-to-date in taxing their vehicles. We will also notify the drivers when their renewal date is close.

Grey Fleet Insurance Policies

If you operate a grey fleet, it's essential that your drivers have business class insurance when driving their own vehicles for work purposes.

With **Visa to Drive**, drivers are required to upload their insurance details to our online system or app which are then verified by one of our expert auditors. Upon renewal, the same process will have to be adhered to.

Should an employee fail to submit their policy on time, we will chase them directly and let you know that the driver has breached your fleet policy.

Vehicle Safety Inspection

Regular, audited vehicle inspections are a fundamental element of fleet management.

Organisations need to be confident that their inspection process is robust to ensure that the vehicle being used, whether a company, grey fleet, rental or pool vehicle, is safe to drive.

Drivers can carry out comprehensive vehicle checks via TMC's app. No more paper work!

You can select what checks the driver should carry out, from a comprehensive list, and at what frequency.

The results are reported back to the business in real time, confirming the vehicle is ok to drive, or flagging any maintenance issues.

Drivers receive a notification on their app to carry out a check.

The checks are designed to

- Ensure all vehicles are fit for the road/purpose/job role
- Provide an online auditable trail of vehicle checks
- Flag maintenance issues
- Improve visibility and safety of your fleet and drivers.

Eyesight Checks

Good eyesight is vitally important when behind the wheel of a vehicle. With UK law requiring drivers to be able to read number plates from a distance of 20 metres, it is important to ensure your drivers have adequate eyesight and are safe to be on the roads.

Our Eyesight Check service asks drivers to upload their latest eyesight check to prove their eyesight is at the appropriate level required by law.

Manufacturer Recalls

We check our database and highlight any vehicles which are involved in manufacturer or warranty recalls.

We will add these vehicles to our reporting to ensure you are notified and can take relevant action.

Winter Checks

To ensure your employees' vehicles are safe and reliable, particularly during the colder months, we can prompt drivers to carry out winter checks and record that they have done so.

These can cover the below:

- Tyre inspections
- Battery tests
- Coolant and antifreeze top-ups
- Windscreen wiper inspections
- Lights assessments
- Oil level replenishment

Visa to Drive is part of our Compliance+ service that takes a comprehensive, proactive approach to reducing occupational road risk by using data to create a 360 degree view of each driver. Additional services include driving licence checks, driver behaviour monitoring through our app, risk assessments and driver training.
